## COMMENTS

Imagine an interaction with another person or a future you.

*I and you **build** our value now.*

We build the value of our interaction. This correlates to oxytocine.

*I will get [meaning of end results]*

What will I gain from the end result? This correlates to testosterone.

*from the [end results]*

Specify the end results. This correlates to serotonin.

*The next move is [the next move]*

This ensures you of the momentum towards the end result. This correlates to acetylcholine.

*I achieve that*

Focus on the next marker. This correlates to dopamine.
